

MIT PHYSICAL CHEMISTRY SEMINARS
Fall, 2019

TENTATIVE SCHEDULE

- Sep 17 **Lauren Webb**, University of Texas at Austin
“Investigating Electrostatic Mechanisms of Biomolecular Organization and Function”
- Oct 1 **Prof. Eugene Shakhnovich**, Harvard University
“Title TBA”
- Oct 22 **Prof. Dan Congreve**, Rowland Institute, Harvard University
“Excitons for Light and Energy”
- Oct 29 **Prof. Anastassia Alexandrova**, UCLA
“Dynamic heterogeneous catalytic interfaces: ensembles of metastable states break the rules of catalysis”
- Nov 5 **Jeffrey Reimer**, University of California, Berkeley
“NMR and the Grand Challenges of Metal-Organic Frameworks”

Nov 12 **John S. Waugh Lecture in Physical Chemistry**
Cancelled
Professor Malcolm Levitt, University of Southampton, UK
“Log-Gaussian States: Breaking the Theoretical Limit”

- Dec 3 **Professor Emily Weiss**, Northwestern University
“Elective Triplet-Initiated Intermolecular Cycloadditions Photocatalyzed by Quantum Dots”
- Dec 10 **Professor Matthias Waegle**, Boston College
“Title”
(BioChem seminar hosted by Yogi)

All MIT Seminars will be at 4:00 PM in **Room 6-120** unless otherwise noted. Refreshments at 3:30 PM outside Room 6-120.
